	<h2>Test Verification of Conformity</h2>	
<p>On the basis of the referenced test report(s), the sample(s) of the below product has been found to comply with the relevant harmonized standard(s) to the directive(s) listed on this verification at the time the tests were carried out. The manufacturer may indicate compliance to only the said directives by signing a DoC himself and may affix the CE marking to products identical to the tested sample(s) if the product complies with all CE marking directives that has the product in their scope. In addition, the manufacturer shall file and keep the documentation according to the rules of the applicable directive(s) and shall consider changes of the standards as they may occur. Additional requirements, additional directives and local laws may be applicable.</p>

<b>NOTE 1: This verification is part of the full test report(s) and should be read in conjunction with it.</b>		
<small>This Verification is for the exclusive use of Intertek's client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Verification. Only the Client is authorized to permit copying or distribution of this Verification. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test/inspection results referenced in this Verification are relevant only to the sample tested/inspected. This Verification by itself does not imply that the material, product, or service is or has ever been under an Intertek certification programme.</small>

<a href="http://www.intertek.com">www.intertek.com</a>		<i>P. 1 of 1</i>

Our ladder systems Scala 1 and Scala 2 were certified 2016 according to the current norm. We have successfully shown that we concur with the most recent requirements in Europe. To guarantee this, our leaning ladders have been equipped with anti-slip covers on the rungs and anti-slip pads at the end of the spar. The contact surfaces is protected by a special rubber cover. Ladders which are used together with rail system, have square rungs and are equipped with suitable end stopper.

More safety gives you a better feeling !
