

**PRESS RELEASE**

**Beyerle, German Manufacturer of Luxury Hardware, Launches New Surfaces for Barn Door Hardware**

Introduction of New Track Rail System PANDORA in golden and rose-gold

ATLANTA, GA: For the first time, Beyerle US will participate at the HD Expo in Las Vegas, May 2-4, 2018. The German leading manufacturer of luxury door hardware for glass and wood doors launches new barn door hardware models, extending its variety beyond stainless steel. Meeting current trends, and to serve customer's desire for vintage-inspired design, Beyerle US is releasing their new barn door hardware system "PANDORA" in fresh color palettes. The new finishes include matt gold, rose-gold, and classic black coated along with their standard satin and polished stainless steel, brushed stainless steel, and dark bronze.

**Metal tones are trending as an interior design element**

Metal tones in matt gold and rose-gold add an attractive detail to both modern and traditional design elements, in any room. Gold and rose-gold hardware paired with dark wood can make a grand statement, without being ostentatious; it gives a warm, soft contrast. Combining glass and gold adds depth to a space. Glass sliding doors allow for natural light to flow through living spaces - imagine how beautiful the golden hardware shines in the sunlight! The visual appeal of contrasting elements of metal, wood, and glass can be the statement piece and essential design feature in modern living spaces.

**Added sweetness for stopping by our booth #2476**

In addition to the new metal-toned line of sliding door hardware, Beyerle US will show its new shower door hardware Urban IV and the Flat Track system Casa in steel, black coated. Those who place an order at our booth during the exhibition will receive a 10% discount on their order. And, don't miss the Lindt chocolate waiting for you to sweeten your visit at our booth, #2476.
